CENTRAL STATISTICAL OFFICE

Monthly Digest of Statistics

U. I. C. C. OCT 7 1974 LIBRARY

342 e 1974 SO 63p net

A publication of the Government Statistical Service

Government Statistical Service

A service of statistical information and advice is provided to the Government by specialist staffs employed in the statistics divisions of individual Departments. Statistics are made generally available through their publications and further information and advice on them can be obtained from the Departments concerned.

The source for further information about series published in this volume is shown at the foot of each table. Current telephone numbers of these sources as well as general information about the *Monthly Digest of Statistics* can be obtained from the Central Statistical Office, Great George Street, London SW1P 3AQ. Telephone 01–930 5422 Ext. 602.

Enquiries about orders and subscriptions should be made to the publisher, Her Majesty's Stationery Office, PO Box 569, London SE1 9NH. Telephone 01-928 6977.

Monthly Digest of Statistics

No 342 June 1974

INTRODUCTION

This *Digest* has been prepared by the Central Statistical Office in collaboration with the Statistics Divisions of Government Departments.

The name of the department or organisation providing the statistics is shown under each table. Some of the statistics provided by departments are actually collected by other organisations such as nationalised boards and trade associations. The assistance provided by these organisations, too numerous to mention individually, is gratefully acknowledged.

The figures in the *Digest* are mainly totals for calendar months or monthly averages.

Some of the figures included in this *Digest* are provisional and may be revised in later issues.

Definitions

A Supplement of Definitions and Explanatory Notes, published with the January issue, gives detailed definitions of all the terms and units used in the Digest. The following general definitions should be noted in using the Digest:

Area covered. Except where otherwise stated, all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

Units of measurement.

Ton = long ton of 2,240 lb.

Tonne = 1,000 kilogrammes

Gallon = imperial gallon

Consumption and stocks. The terms 'consumption', 'disposals' and 'stocks' are defined in detail in the Supplement to the Digest. Figures of consumption and stocks are seasonal and should be used with caution. The stocks figures given may often relate to only part of the total stocks in the country.

External trade. Owing to differences in coverage and timing, figures of imports and exports are not always comparable with those for production, consumption and stocks.

Symbols and conventions used

Symbols. The following symbols are used throughout:

- .. not available
- nil or less than half the final digit shown
- * average (or total) of five weeks

Change of basis. A line drawn across a column between two consecutive figures indicates that the figures above and below the line have been compiled on different bases and are not strictly comparable. In each case a footnote explains the difference.

Rounding of figures. In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

Supplementary tables

Supplementary tables published recently in the *Digest* are listed below, together with the date of issue in which they appeared:

Central Statistical Office, Great George Street, London, SW1P 3AQ

Note: The annual and quarterly estimates include revisions which have not yet been incorporated in Tables 4, 6, 7 and 52.

(1) Equals total final expenditure on goods and services at market prices less imports of goods and services less taxes on expenditure plus subsidies. Estimates of the gross domestic product at constant factor cost based on statistics of output are given in Table 3.

(2) Including a fall in the book value of stocks of £280 million in the second quarter of 1973 reflecting tax rebated on the introduction of VAT; the rebate is also included as a deduction from taxes on expenditure and the estimate of gross domestic product at factor cost is thus not affected.

(3) This represents taxes on expenditure less subsidies valued at constant rates.

(4) Provisional.

(2) Employers' contributions to national insurance, etc. and pension funds.

(3) National insurance benefits, family allowances, assistance grants, war pensions and service grants, etc.

(4) Income from rent and self-employment, before providing for depreciation and stock appreciation, dividend and net interest receipts and transfers to charities from companies.

(6) Including from 2nd quarter 1973 tax credits on dividends.

(°) Including from 2nd quarter 1973 imputed tax payments set against tax credits on dividends less payments of these tax credits by the Inland Revenue.

(²) Equals total personal income before tax less payment of taxes on income, national insurance, etc. contributions, and net transfers abroad.

(a) Before providing for depreciation, stock appreciation and additions to tax reserves.

(*) Personal saving as a percentage of total personal disposable income is shown in italics.

(°°) Personal disposable income revalued by the implied consumers' expenditure deflator (1970 = 100).

- (¹) Estimates for 1962–70 have been revised in the light of the preliminary results of the 1971 Census. Figures for 1971 and 1972 have been revised and are based on the final results of the 1971 Census.
- (2) The mid-year estimates, for Scotland from 1962–1972 have been revised in the light of the final results from the 1971 Census.
- (3) The mid-year estimates for 1971 and 1972 for Northern Ireland have been revised and are based on final figures of the 1971 Census. They are not comparable with the estimates for the period 1961–70, which were linked to the 1961 and 1966 Censuses.
- (4) The Persons all ages figures for 1962–1970 have been revised in the light of the final results of the 1971 Census. Corresponding revisions for males and females separately will be available later this year.

^(*) Estimates for June 1969(a) are classified according to the Standard Industrial Classification 1958 and are not fully comparable therefore with the estimates for June 1969(b) which are classified on the basis of the Standard Industrial Classification 1968.

Sources: Department of Employment Department of Manpower Services (Northern Ireland)

⁽²⁾ See footnote (1) to Table 16.

⁽⁴⁾ The industries included in the index of production are Orders II-XVIII of the Standard Industrial Classification 1958 and Orders II-XXI of the Standard Industrial Classification 1968.

⁽⁴⁾ Excluding private domestic service.

⁽⁶⁾ The estimates of agriculture are taken from the June censuses of agriculture and exclude a small number of employees of agricultural machinery contractors. It should also be noted that the figures include seasonal and temporary workers.

Employees in employment: production industries(1)(2)

^{(1) (}a) Until 1971 the annual employment statistics were derived mainly from counts of national insurance cards. In 1971 a new system was introduced because of proposals to abolish the use of national insurance cards for employees within the next few years.

See footnotes (2) and (3) on page 19.

⁽b) The new system relies on returns from employers. In order to provide a link between the old system and the new system, both a card count and a census under the new system were taken in 1971.

⁽c) The old count of national insurance cards included many employees who work for part of the year only and who would not have been in employment in the particular week in June when the census was taken. Mainly for this reason the census figure for June 1971 is considerably lower than the card count. Another difference is that a person who had two regular jobs with different employers in the week of the census was counted twice in the census but only once in the card count, so that the census figures are higher than the card count in some industries and services where secondary employment is common.

Employees in employment: production industries(1)(2)

Note: Figures have been rounded independently, thus there may be an apparent slight discrepancy between the sum of the constituent items and the total.

- (1) The figures include established and unestablished non-industrial and industrial staff but exclude casual or seasonal staff (recruited for periods of normally less than six months) and employees of the Northern Ireland Government. Two part-time employees are counted as one whole-time employee.
- (2) The figures prior to 1 July 1972 have been adjusted to show staff in current Ministerial areas so that the figures in all columns are on a comparable basis.
- (3) Excluding headquarters staff, but including research and development establishments and Royal Ordnance factories.
- (4) From 1 April 1974 Royal Ordnance Factories are shown separately.
- (*) These figures include estimated breakdown of certain staff recently transferred to Ministry of Defence and may be subject to later amendment.

⁽¹) The numbers of workers returned from June 1970 onwards are not comparable with those returned in previous years because of changes in the census in the coverage of labour in England and Wales. These changes comprised:

(a) extending the concept of farm work to include managerial and secretarial work;

(b) requesting for the first time the separate return of farmers, partners and directors; and

(2) Includes family workers but excludes farmers' wives.

(3) Including regular part-time workers.

(4) Including estimated figures for Scotland.

21

⁽c) defining, from 1970 to 1972 'regular whole-time' workers as those engaged in work on the holding for 40 hours or more per week and 'regular part-time' as those engaged for less than 40 hours per week.

Note: This table has been revised and is now based on information from the Census of Employment (see footnote (1) to Table 16). The estimates are not comparable with estimates prior to June 1971 which were based on mid-year counts of national insurance cards.

(1) Orders III—XIX of the Standard Industrial Classification 1968.

(3) Excluding maintenance staff.

(5) In February 1972, and again in January, February and March 1974, the volume of overtime and short-time was affected by the energy crisis.

⁽²⁾ Figures relate to establishments with more than 10 employees in all manufacturing industries except shipbuilding and ship repairing.

⁽⁴⁾ Operatives stood off for the whole week are assumed to have been on short-time to the extent of 40 hours each.

⁽⁶⁾ Figures after June 1973 are provisional and are subject to revision when the results of the 1974 Census of Employment are available.

					<u> </u>		<u> </u>				1		

⁽¹) Including ex-service men and women and other unemployed persons aged 18 years and over not classified to an industry. Unemployed school-leavers (i.e. persons under 18 not in full-time education who have not yet taken up employment) and adult students seeking temporary employment during vacation are excluded. The All industries figures are adjusted to take into account amendments notified on the four days following the date of the count. All other figures from May 1972 are not so adjusted.

⁽²⁾ The base used in calculating the percentage rate of unemployment is the estimate of total employees (employed and unemployed).

(') The total unemployment is adjusted to take into account amendments notified on the four days following the date of the count. The analyses by duration from May 1972 onwards are not adjusted. Prior to May 1972, casuals were excluded from this analysis. See Department of Employment Gazette, June 1972.

(2) Because of the energy crisis the detailed information about duration of unemployment was not collected in these months.

(1) Excludes stoppages involving fewer than 10 workers or lasting less than one day except any in which the total number of working days lost exceeded 100. The figures from 1974 are provisional.
(2) From January 1970 the analysis by industries is based on the Standard Industrial Classification 1968. Figures

prior to that date are based on the Standard Industrial Classification 1958.

(3) Where stoppages extend over more than one month, the workers involved are counted in the month in which they first participated.

⁽⁴⁾ The figures of working days lost relate to the total working days lost within each of the periods shown as a result of stoppages in progress in that period, whether the stoppages began in that period or earlier.

(¹) Figures for individual months are averages of the four or five weeks ending on the last Tuesday of each month.

(2) Invalidity benefit was introduced on 23 September 1971. (3) Including prescribed industrial disease.

(5) These figures include substantial numbers of persons who have been sick for a long time and who may no longer be in employment.

- (e) Up to May 1972, these estimates are based on a standing sample of claimants. Subsequent figures are provisional estimates derived from the numbers of new claims and will be replaced later by final estimates from the sample. Yearly figures are averages of twelve monthly figures.
- (7) Yearly figures are averages of quarterly figures. Quarterly figures relate to the first Monday in February, May, August and November.
- (*) Including pensioners in receipt of Old person's retirement pension awarded under National Insurance Acts 1970 and 1971.
- (9) Including a diminishing number of widows with pensions of 30s a week derived from the old Contributory Pensions Acts. (10) Figures for 1973 are provisional.
- (11) Including the elder or eldest child for whom no allowance is payable.

* Average of five weeks.

Source: Department of Health and Social Security

⁽⁴⁾ Excluding claims made under the emergency benefit procedure. Figures for individual months are averages of the four or five weeks starting on the first Monday of each month.

(1) Pension age means 65 years for men and 60 years for women.

(2) Some of the supplementary pensions provide for the requirements of a household with more than one pensioner.
(3) Includes a small number of persons over pension age.

Source: Department of Health and Social Security

(4) The figures for November 1972, May 1973, August 1973, November 1973, and January 1974 now exclude the unemployment cases who received no payment of supplementary pension or allowance during the week of the count.

(5) The quarterly count of Supplementary benefit recepients was not conducted for that month.

(6) Provisional.

	,							

(¹) With effect from June 1970 the census was extended in Great Britain to cover all holdings with significant output including those on one acre of agricultural land or less (previously excluded), at the same time about 16,000 holdings in Scotland with negligible output were excluded from the census. In Northern Ireland excluding holdings of less than one acre until 1972 but numbers of livestock in Northern Ireland were collected from all

owners (including landless stockholders). As from June 1973 the threshold for inclusion in the census was raised from 26 to 40 standard man-days in Great Britain, excluding from the census about 3,000 holdings on 18,000 acres of land in England and Wales and nearly 5,000 holdings on 167,000 acres in Scotland. At the same time the 40 man-day concept was introduced in Northern Ireland resulting in the elimination from the census of some 8,000 statistically insignificant holdings on 40,000 acres of land and the inclusion of 2,000 or so holdings previously excluded (except to the extent of obtaining estimates of numbers of livestock on them) because they had less than one acre of land. (*) Excludes Scotland. (*) Includes maize for threshing in England and Wales. (*) Weight in pods. (*) Shelled weight. (*) England and Wales only. (*) Clover and rotation grasses including lucerne in England and Wales. (*) Production figures relate to hay only. The production of hay in England and Wales is calculated from the area cut for hay and actually harvested and does not include the area mown for silage, drying or seed: the production of hay in Scotland and Northern Ireland is calculated from the area cut for hay only and does not include grass mown for silage or drying. (*) Includes hay from lucerne in England and Wales and from permanent grass in Scotland. (*) Includes the total area of deer forest land in Scotland.

⁽¹) A small quantity of molasses spirit is used in beverage spirit production. See explanatory notes in the Supplement to Table 74. (²) The sub-headings indicate the description of the spirits at the time of duty payment. (³) From July 1973 separate information of clearance in bottle is not available for wine at other rates of duty. (⁴) Provisional.

⁽¹) An article introducing this analysis was published in *Economic Trends*, November 1973.
(²) This does not include grain milling, animal and poultry foods and vegetable or animal oils and fats industries which are classified to intermediate goods-materials.

⁽³⁾ The total of weights for all index of production industries is 1,000.

Department of Employment

⁽²⁾ Quarterly estimates are derived as averages of the monthly figures.

⁽³⁾ In the absence of earnings data for February 1972 due to the effects of the coalmining dispute no index of wages and salaries per unit of output has been calculated for that month. The indices calculated for January and March 1972 are less reliable than usual.

VII. ENERGY

Inland energy consumption: primary fuel input basis

June											

⁽¹) Because of the coal miners' strike which began 9 January 1972, the statistics are incomplete.
(²) An overtime ban by mineworkers started on 12 November 1973, followed by a national strike on 10 February 1974. Normal working was resumed on 11 March.
*Average of five weeks.

^(*) From January 1971, figures relate to sales by manufacturers in Great Britain employing 25 or more persons, and who are classified to MLH 274 (paint). The figures also include sales of principal products of this industry by establishments classified to MLH 271 (general chemicals) and MLH 494/1 and 2 (toys, games and children's carriages).

From third quarter 1971, the figures relate to sales by manufacturers in the United Kingdom.

⁽¹) Industrial ethyl alcohol is distilled from molasses or derived from other processes: the current usings of molasses spirit in beverage spirit production are believed to be comparable with the usings in the preceding financial year—see explanatory notes.

Sources: HM Customs and Excise Department of Industry

⁽²⁾ From July 1971 figures relate to sales by manufacturers in the United Kingdom employing 25 or more persons and who are classified as MLH 275 (soap and detergents). The figures also include sales of synthetic detergents by establishments classified to MLH 271 (general chemicals), MLH 272 (pharmaceutical chemicals and preparations) and MLH 279/1 (polishes).

⁽³⁾ A short standard is 7,200 matches.

⁽¹⁾ From 1971, firms employing less than 25 persons are excluded, but there are a few additional firms. The net change

in coverage is very small and details are published in the Business Monitor series, reference P2.

⁽²⁾ Excluding mopeds and scooters.

Passenger cars(1)

^{(&#}x27;) Including chassis delivered as such by manufacturers. The value of deliveries of commercial vehicles is shown in

^[2] Beginning in 1973 the headings under which data are collected were changed. The new heading of Car derivatives (i.e. vans derived from car chassis) has virtually the same coverage as the heading it replaced, Commercial vehicles not over 1½ tons. Although not all commercial vehicles under 1½ tons gross vehicle weight are classed as car derivatives and it is also possible for car derivatives to exceed 1½ tons gross vehicle weight, the difference between the two categories is small as far as UK production is concerned. The series as given may therefore be regarded as sufficiently continuous for the analysis of trends. The combination of the two series, car derivatives and commercial vehicles under 10 tons gross vehicle weight is identical in coverage with the sum of the two series that have been superseded.

⁽³⁾ Complete and chassis.

^{(4) 53} week period.

^{*} Five week period.

(¹) Includes naval vessels registered as merchant ships.
(²) Gross tonnage (100 cubic feet per g. t.) is the total volume of all the enclosed spaces of a vessel.

(3) The total tonnage specified on ordering vessels differs slightly from the total actual measured tonnage on

(*) Vessels are shown for export if they are for other than UK registration.
(*) Modifications include alterations of 500 gross tons or more to the tonnage and the country of registration of vessels already on order.

(6) Modifications and cancellations exceed new orders for the period.

Merchant shipbuilding(1): vessels of 100 gross tons and over(2)

(1) Includes naval vessels registered as merchant ships.

(4) Vessels are shown for export if they are for other than UK registration.

^(*) The total tonnage specified on ordering vessels differs slightly from total actual measured tonnage on

⁽⁵⁾ Modifications include alterations of 500 gross tons or more to the tonnage and the country of registration of vessels already on order.

⁽⁶⁾ Modifications and cancellations exceed new orders for the period.

⁽¹⁾ Spinning, doubling processing and weaving parts of the cotton industry, plus man-made fibre, wool, carpets and hosiery industries. (2) These indices have been adjusted to allow for the differences in the lengths of calendar months but not for holidays or for other seasonal variations. (3) The monthly provisional index numbers for individual sectors relate to the total output of manufacturers whose main business is in that sector of the industry. These are subsequently revised in the light of sales figures of the principal products of each clothing sector as reported in the quarterly sales inquiries.

(*) The coverage of the inquiry from which this table is compiled was extended at the end of 1970 and the earlier figures have been adjusted to provide a broadly comparable series. It must be emphasised, however, that the conversions have been based on linking factors spanning the 4th quarter 1970 and 1st quarter 1971 only and they should be treated with caution.

⁽²⁾ Prior to the 3rd quarter 1971 these figures relate to woven carpets faced with more than 50 per cent of man-made fibres.

⁽a) Prior to the 3rd quarter 1971 export figures are those reported directly by manufacturers. From that date they are those recorded in the Overseas Trade Statistics.

(1) Figures for labour employed by contractors are shown in Table 19.

(2) Figures include repair and maintenance, direct labour of public sector and estimates of unrecorded output by small firms and self-employed workers.

(a) Output of operatives employed directly by government departments, local authorities and certain other public authorities on construction work, excluding gas, water and electricity undertakings.

(4) Provisional.

⁽¹) and (²) See footnotes (¹) and (²) to Table 107.
(³) For England and Wales from the beginning of 1972 the figures of Under construction for private owners are not strictly comparable with those for earlier years.
(4) For Northern Ireland from the beginning of 1974 the figures of construction begun for local housing

authorities are not strictly comparable with those for earlier years.

⁽¹) Excluding building which is wholly financed from private sources. (²) From January 1960 for Scotland and from April 1960 for England and Wales the cost of school meals projects has not been separately recorded. The value of such projects, shown separately for the years 1946 to 1959 in previous tables of educational building, has been included as appropriate under the headings Primary and secondary and Special schools. (³) Figures for England and Wales include the value of projects for which specific approval is not required. (*) Totals for England and Wales include the value of certain projects for which no analysis between type of project is available. As from October 1961, the individual value of such projects is less than £2,000. (*) Figures for England and Wales relate to project values and those for Scotland to contract values. Figures for Scotland include the cost of certain main projects for which specific approval is not required. (*) The Scottish figures of Under construction and Completions are based on the tender costs. The Under construction and Completions figures exclude the value of approved school projects which in 1969 amounted to £1,246,000 and £406,000 respectively.

⁽¹) The method of calculation of the number of new places provided differs in England and Wales and Scotland. In England and Wales the figures refer to the number of pupils for which new school accommodation is designed. In Scotland the figures refer to the sum of the approved capacities of all the teaching rooms whether classrooms or practical rooms, and will normally exceed the number of pupils for which accommodation is designed.

June 15									

⁽¹) Passenger journey figures are not strictly comparable owing to the transfer from British Rail to London Transport railways of the London Paddington to Westbourne Park service on 1 January 1970. In addition, the new 14 mile Victoria Line was opened to traffic by London Transport in four stages on 1 September and 1 December 1968, 7 March 1969 and 23 July 1971. (²) The four-weekly averages for each year are computed from calendar year totals. (³) Provisional.

⁽¹⁾ The four-weekly averages for each year are computed from calendar year totals.

Source: Department of the Environment

⁽²⁾ Freight train traffic only.

(3) From January 1969, figures do not include freight carried on behalf of National Carriers Ltd. and Freightliners Ltd.

⁽⁴⁾ From January 1972, four-weekly figures of net ton mileage are estimated.

⁽⁵⁾ Provisional.

United Kingdom airlines(1) Aircraft kilometres flown, passengers, and cargo uplifted

⁽¹⁾ Scheduled services only. All kilometre statistics are based on standard (Great Circle) distances.
(2) Slight discrepancies between certain totals and the sum of their constituent items are attributable to the rounding of figures.
(3) Including weight of vehicles uplifted on vehicle ferry services, mail, excess baggage and diplomatic bags.

United Kingdom airlines(1) Tonne-kilometres and seat kilometres used

⁽¹) Statistics of visible trade on a balance of payments basis are obtained by making certain adjustments in respect of valuation and coverage to the statistics recorded in the Overseas Trade Statistics. These adjustments are summarised in Table 122 above; they are described in detail in United Kingdom Balance (2) Export unit value as a percentage of the import unit value Index.

of Payments 1973. (2) Ex (3) Affected by the dock strike.

(4) Provisional.

Value of exports (f.o.b.): analysis by commodity classes

⁽¹⁾ The total currency flow, together with Allocation of Special Drawing Rights and Gold subscription to the IMF. (2) From July 1972 transactions with IMF affecting the United Kingdom reserve position in the Fund are included as changes in the official reserves. (3) From 23 August 1971, valued in sterling at transactions rates of exchange. Therefore, from the third quarter of 1971 the sterling valuation of the flow does not equal the difference between the opening and closing levels which are converted at parity in Table 143.

(¹) Figures are calculated to end-September 1971 at \$2.40 = £1, from end-December 1971 to end-January 1973 at \$2.6057 = £1 and from end-February 1973 at \$2.89524 = £1. (²) Drawings from the IMF, net of repayments by the United Kingdom and drawings of sterling from the IMF by other countries. From July 1972 excludes transactions affecting the United Kingdom gold tranche. (²) Borrowing from other monetary authorities, and a consortium of Swiss banks in 1967, in the form of foreign currency deposits or assistance with a sterling counterpart. (⁴) From July 1972, the official reserves were redefined to include the reserve position in the IMF. From end-April to end-June 1972, this stood at £292 million.

(1) In addition to its lending, the National Loans Fund meets the interest and management charges of the National Debt. To the extent that these charges are not matched by interest received on its own lending and by profits of the Issue Department of the Bank of England, the Consolidated Fund meets the difference. The surplus on the Consolidated Fund is paid to the Fund, leaving the difference between that and its net lending as the Fund's financing requirement. (2) Loans under the Ship Credit Scheme and to the Shipbuilding Industry Board, housing associations and building societies. (3) Loans to Votes for US military aircraft, Town and Country Planning compensation, Redundancy Fund and lending to Northern Ireland Exchequer.

⁽¹⁾ This is equal to Exchequer borrowing and special transactions (net) less receipts from extra-Exchequer funds, etc. It is also equal to the amount the central government borrows less any increase (or plus any decrease) in its official reserves.

(5) Excluding borrowing from the National Loans Fund.

Sources: HM Treasury
Central Statistical Office

⁽²⁾ A negative item represents a surplus, a positive item a deficit.
(3) Including in March of each year transfer of surplus of the death duties surrendered securities account.

⁽⁴⁾ The cumulative monthly figures do not agree precisely with the quarterly figures because of adjustments, incorporated in the latter, for accrued interest on National Savings and for issued coin.

^(*) Adjustment for redemption of government guaranteed stock.
(*) Consolidated Fund liability for service of the National Debt: balance carried over until March.

(1) Average of figures on Wednesdays.

Sources: Bank of England Bankers' Clearing House

£ million

^(?) Months: average of figures on Saturdays in consecutive four-week periods as published in *The London Gazette* or in *The Belfast Gazette*, with as close a correspondence as possible to the calendar months. Years: average of the thirteen published figures.

⁽³⁾ Total notes and coin outstanding, less notes and coin held by the Bank of England, Banking Department, and by the London and Scottish clearing banks and Northern Ireland banks.

⁽⁴⁾ From 1 July 1969 all bank clearings are worked on a 5 day week.

^(*) Not comparable with earlier figures owing to mergers among the London clearing banks. See Supplement of Definitions and Explanatory Notes.

⁽e) Not comparable with earlier figures owing to the exclusion of credit transfers processed by Bankers' Automated Clearing Services.

⁽¹⁾ Excluding securities of the British government and nationalised industries.

⁽²⁾ The figures have been revised to exclude estimates of the subscriptions arranged by United Kingdom

sponsors to international issues.

(3) The estimates include United Kingdom local authority negotiable bonds (of not less than one year) issued to or through the agency of banks, discount houses, issuing houses or brokers.

^(*) In Northern Ireland included in Other manufacturing.

⁽²⁾ The annual figures are averages of the figures for February, May, August and November, except for the Northern Ireland figures for 1970, which comprise the February figures only.

⁽a) Because of difficulties of classification it is not possible, before November 1973, to include advances made by the six finance houses recognised or confirmed as banks in January 1972 or January 1973. Advances by five finance houses totalled £1,070 million at mid-May 1972, £1,154 million at mid-August, £1,261 million at mid-November, £1,388 million at mid-February 1973 and by all six £1,711 million at mid-May and £1,894 million at mid-August.

⁽⁴⁾ Figures in several categories have been revised from May 1972 onwards.

⁽⁵⁾ The average for 1972 is calculated after adding to the February figures the difference between the two lines of figures in May.

⁽e) Excluding advances by the six finance house banks.
(7) Before and after the transfer of certain credits from Bills to Advances (see Supplement of Definitions and Explanatory Notes) and certain other revisions.

(a) Before and after the inclusion of advances by the six finance house banks.

(b) Including advances by the six finance house banks.

⁽¹⁰⁾ Excluding funds placed through the specialised financial markets.

⁽¹¹⁾ Largely advances in foreign currencies. Advances to overseas residents by Northern Ireland banks are not distinguishable from their advances to United Kingdom residents.

(1) Derived from yield-maturity curves fitted mathematically. The break shows a change in the method: an article in the Bank of England Quarterly Bulletin December 1972 describes the new method of calculating the curve which is now based on the prices and coupons for all stocks except a few with special features. Before 1971, the curve was fitted to yields on stocks with coupons of 5 per cent or more. (The old method was described in the March 1967 Bulletin). The yearly figures are averages of end of month yields. The monthly figures relate to averages of Wednesdays, except for 1971, where they are for end-months. Figures have been revised from January 1973. See article in the Bank of England Quarterly Bulletin September 1973.

(2) Average of working days, based on the mean of the middle opening and middle closing prices each day, excluding gross accrued interest; tax is ignored. (3) Averages of daily figures calculated from middle market closing prices. (4) Gross redemption yields of 15 stocks so combined as to give a yield average for a constant 20-year term.

5 stocks so combined as to give a yield average for a constant 20-year

(1) With effect from 13 October 1972 the Bank of England's minimum lending rate to the market will normally be one half per cent higher than the average rate of discount for Treasury bills established at the most recent tender, rounded to the nearest one quarter per cent above; the rate normally becomes effective for lending by the Bank from the following Monday.

(¹) The figures represent the average earnings, including bonus, overtime, etc., and before deduction of income tax or insurance contributions, in one week in the months indicated. Administrative and clerical workers and other salaried persons have been excluded. Certain qualifications are given in a full account of the enquiry relating to October 1973, published in the Department of Employment Gazette for February 1974.

Source: Department of Employment

(2) From and including October 1967 includes (a) dock workers previously on daily or half daily engagements and (b)

(3) This index relates only to the industries covered by the earnings enquiry. It should not be confused with the figures in Table 167 which cover all industries.

Average weekly hours worked(1)

⁽¹⁾ England and Wales only. (2) Except sea transport and postal services. (3) Consisting of laundries and dry cleaning, motor repairers and garages and the repair of boots and shoes. (4) For notes on the index classified according to Standard Industrial Classification 1968, see pages 470–471 of the Employment and Productivity Gazette for May 1970. (5) Because of the disputes in coal mining a reliable index for Mining and quarrying cannot be calculated for these months. In each case the figures for coal mining for a month earlier have been used in the compilation of the index for All industries and services covered.

Index of average earnings of all employees (monthly enquiry)

⁽e) As industrial activity was severely disrupted by restricted electricity supplies the monthly survey was not carried out in February so figures cannot be calculated for this month. (7) The figures reflect temporary reductions in earnings while three day working and other restrictions were in operation during January and February 1974. (e) Provisional. (e) Insufficient information is available to enable a reliable index for Agriculture to be calculated for the current month but the best possible estimate has been used in the compilation of the index for All industries and services covered.

Average weekly earnings of manual workers in certain industries(1)

(¹) The figures are based upon changes in basic rates of wages or minimum entitlements and reductions in normal weekly hours, which are normally determined by national collective agreements or statutory wages regulation orders. The information relates to the end of the month and, where necessary, the figures may be revised to take account of any changes having retrospective effect or reported belatedly. A brief note on the method of compilation of the figures is given in the current issue of the Department of Employment Gazette.

(2) In general, males under 21 and females under 18 years of age.

⁽³⁾ The term Manufacturing industries covers all industries included in Orders III-XIX of the Standard Industrial Classification 1968.

(*) The figures relate to changes in basic full-time weekly rates of wages or minimum entitlements and do not reflect reductions in normal weekly hours without loss of pay or variations in actual earnings arising from such factors as overtime or lost time. The changes included are those determined by national collective agreements or by statutory wages councils or boards.

(2) The monthly totals in the columns headed increase and Decrease relate to the number of workpeople affected by changes and the corresponding gross amounts. Workpeople affected by two or more changes are counted only once in the annual totals which relate to the number having increases only or for whom increases exceeded decreases, the number having decreases only or for whom decreases are exceeded increases, and the corresponding net amounts; the column headed Net increases, is therefore the overall net increase for the year.

(3) The annual totals of net increases in basic weekly rates of wages mean that the total wage bill of the country, in the industries and for the workpeople covered by the statistics, for a full ordinary week's work at basic rates of wages at the end of any one year exceeds that for the corresponding week of the preceding year by the amount stated. The average weekly wages paid during any one year will not, however, exceed those paid during the preceding year by this sum, as the actual changes will have taken place at various dates during the year.

June 18													

⁽¹⁾ The Cost of Living Advisory Committee (now renamed the Retail Prices Index Advisory Committee) recommended in 1962 that until a satisfactory index series based on actual prices became available half the expenditure on meals out should continue to be allocated to the food group and the other half spread proportionately over all groups, including the food group. The index for meals out for 16 January 1968 implicit in this recommendation was 121-4. Since January 1968 an index series based on actual prices has been available and indices in this series have been linked with the implicit index for meals out for 16 January 1968, to obtain indices for meals out with 16 January 1962 taken as 100.

⁽¹) From July 1971, revised method of calculation to include levies on certain imported food materials.

(2) Index of building costs: figures relate to average for the quarter.

Source: Department of Industry

⁽³⁾ The index covers only dwellings on which building societies have advanced mortgages during the period. The cost of land is included. Figures relate to average for the quarter.

Index numbers of wholesale prices

1970 = 100

⁽⁴⁾ Reductions in the VAT-exclusive prices of alcoholic liquor, tobacco and cigarettes, matches and mechanical lighters took place in April. These reductions resulted from lower revenue duties designed to offset additional tax revenue from VAT. With unchanged prices in April for these products index numbers for months from April onwards would have been higher by the following: all manufactured products 1·7; chemicals and allied industries 0·2; products of manufacturing industries other than food, drink and tobacco and engineering and allied industries by less than 0·05.

(5) Previsional.

(1) Based on manufacturers' list prices.

(2) The market-price series are based on prices before the addition of subsidies when paid to producers under the Cereals Deficiency Payments Scheme and Fatstock Guarantee Scheme.

(4) Maincrop potatoes only.

Source: Ministry of Agriculture, Fisheries and Food

⁽²⁾ The gross-price series for wheat, cattle and pigs are based on prices after the addition of subsidies when paid to producers; that for milk on prices paid to producers by the marketing board and that for potatoes on producer prices, sometimes supported by the Potato Marketing Board.

^(*) Based on BEMB prices to producers under the Egg Contract Schemes until March 1970. From April 1970 until March 1971 based on guaranteed minimum prices to producers at packing stations and thereafter on average price paid to producers at packing stations.

⁽⁶⁾ Based on net prices to farmers after deduction of subsidy. (7) Provisional.

The United Kingdom in figures

Now available from the Central Statistical Office—the 1974 edition of this free pocket-sized guide, in which statistics tell the story of changes in Britain's life-style since the war.

The years 1951, 1968, 1972 and 1973 are represented by over 100 key series of figures. Subjects covered include population, employment, output, income, balance of payments, transport, housing, health and education.

Write to Press and Information Office, Central Statistical Office, Great George Street, London SW1P 3AQ, indicating the number required and if you wish to receive a similar quantity of future editions.

Business Monitors make it easy to get the facts about your industry

Business Monitors contain the latest official statistics about a very wide range of topics.

With their help you can compare the performance of your own firm with that of your industry as a whole. You can see which product sales are expanding and providing market opportunities. And in many cases you can see what is happening to competing products and follow the experience of industries you supply or that supply you.

Monitors can be an invaluable aid in effective marketing and planning.

They are published monthly, quarterly or annually in four series:

Production Series. Carries latest figures of output, often with considerable detail of individual products. Additional information is often included (imports and exports, prices, employment, consumption and stocks, for example).

Census Series. Gives annual figures of gross and net output, employment, wages and salaries, investment and the value of stocks and work in progress for 154 separate industries.

Service and Distributive Series. Contains statistics showing movements in turnover of various sectors of retail and catering trades, instalment credit business of retailers and finance houses, and assets and liabilities of finance houses.

Miscellaneous Series. Gives detailed statistics on motor vehicle registrations, cinemas, finance, shipping, and overseas travel and tourism.
